

35-Series Filters for Scale

The Nephros 35-Series filters are ideal for reducing and controlling scale in hard water. This model type offers large gallon capacities for the delivery of high-quality water at beverage or food applications, and ice machines, while optimizing equipment performance.

- Formulated without carbon or polyphosphates
 - Polyphosphates have associated risks of environmental impact
- Supports extended equipment life and reduces maintenance and energy costs
- High gallon ratings (22K-55K)
- Available in multiple keys to fit either our proprietary manifold or Everpure and 3M/Cuno manifolds
