

Installation Kit – S100 Low-Profile Sink Adapter⁽¹⁾

70-0351

This installation kit is for use with the Nephros S100 Sink Spout Filter and the S100 Sink and Shower Spray Filter, allowing these fixture filters to be installed on sinks with low-profile faucets or sensor faucets that cannot be adjusted to accommodate a filter.

The lead-free kit helps facilities maintain required spacing between the spout and basin based on sink and faucet dimensions, while enabling filter installation on faucets where it was previously not possible without replacing the faucet. The included aerator adapter kit supports multiple faucet connection types, expanding compatibility across a wider range of sink setups.

Kit Contents

- (1) Low-Profile Sink Adapter Arm
- (1) S100 CPC Aerator Adapter Kit
